

## Making the best of your “Guided Design Service” Appointment:

### Things to bring:

---

- ☐ Area measurements. Important measurements to include are the total length and depth of the space. The height off the ground and the length of any windows and any utilities.
- ☐ Pictures (even if they are just on your phone) of the area. Include a few pictures that are far enough back to give us a good idea of the size of the area.
- ☐ A listing of any plant preferences or priorities for the space; such as - mostly evergreens or would prefer pink blooms.
- ☐ A list of the following site conditions: Sun exposure and duration, site drainage

### What to expect:

---

During your appointment we will sit down and come up a general plan of action and then dive into the nitty gritty of plant selection. Expect your appointment to last approximately 1 hour.

To make the most of your time we highly encourage materials and photos be dropped off or emailed 48 hours ahead of the appointment. Emails can be sent to [nursery@moscarillos.com](mailto:nursery@moscarillos.com)

Thank you for choosing Moscarillo's!
